### **DETAILED ACTION**

1. Claims 8-13 are pending in this office action.

#### Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 24, 2006, has been entered.

# Response to Arguments

3. Applicant's arguments with respect to claims 8-13 have been considered but are most in view of the new ground(s) of rejection.

## Rejections

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior office action.

### Claim Rejections - 35 USC § 102

5. <u>Claims 8-10 and 13</u> are rejected under 35 U.S.C. 102(e) as being anticipated by Matsuzaki et al. (U.S. Patent No. 6,289,314).

Art Unit: 2136

Regarding <u>claim 8</u>, <u>Matsuzaki et al.</u> teaches an information processing system for processing media contents from a content provider, comprising:

Page 3

- At least one information processing apparatus for processing accounting information (fig. 2, ref. num 3 and col. 16, lines 3-21, the accounting information is parameters like the coefficient of charge, which are then processed by the terminal in order to properly descramble the scrambled content);
- A control apparatus configured to enable the flow of said media contents from said content provider directly to said at least one information processing apparatus (fig. 2, ref. num 2 and col. 14, lines 35-41); and
- A master information processing apparatus in communication with said at least one information processing apparatus and said control apparatus (fig. 2, ref. num
   2), said master information processing apparatus including:
  - A first transmitter to transmit appropriate proxy account settlement information to said at least one information processing apparatus (col. 14, lines 38-41, fig. 3, ref. num 254, and fig. 3, output "TO SECOND CHARGE MANAGING PORTION 223");
  - A first receiver to receive said accounting information from said at least one information processing apparatus sent in response to said proxy account settlement information (col. 15, lines 12-36, fig. 3, ref. num 251/252, fig. 5, and fig. 3, input "FROM SERVER I/F 24"),
    - Said accounting information related to payment for said media contents (col. 15, lines 24-30),

Art Unit: 2136

Said media contents received directly by said at least one information processing apparatus from said content provider (col. 14, lines 35-38),

Page 4

- Said first receiver generating payment information when said accounting information is processed (col. 16, lines 3-21);
- A second transmitter to transmit said payment information to said control apparatus (fig. 2, ref. num 212 transmits information to the INTERNAL SCRAMBLER 23 and then to the SERVER I/F 24, where the data can go to the TERMINAL MANAGING PORTION 25 or the end terminals 3); and
- A second receiver to receive registration conditions from said control apparatus (fig. 2, ref. num 221, received from the TERMINAL MANAGING PORTION 25, which obtained information from the end terminal 3),
  - Said registration conditions prepared in response to receiving said payment information from the master information processing apparatus that settles payment for media contents received directly by said at least one information processing apparatus (col. 16, lines 34-59).

Regarding <u>claim 13</u>, <u>Matsuzaki et al.</u> teaches a method for controlling the flow of media contents from a content provider to at least one information processing apparatus, comprising:

Art Unit: 2136

• Enabling the flow of said media contents from said content provider directly to said at least one information processing apparatus, which processes accounting information (fig. 2, ref. num 2 and col. 14, lines 35-38 and col. 16, lines 3-21, the accounting information is parameters like the coefficient of charge, which are then processed by the terminal in order to properly descramble the scrambled content); and

Page 5

- Controlling communication between a master information processing apparatus and said at least one information processing apparatus (fig. 2, ref. num 24 and 25), including:
  - Transmitting appropriate proxy account settlement information from said master information processing apparatus to said at least one information processing apparatus (col. 14, lines 38-41, fig. 3, ref. num 254, and fig. 3, output "TO SECOND CHARGE MANAGING PORTION 223");
  - Receiving said accounting information at said master information
    processing apparatus from said at least one information processing
    apparatus sent in response to said proxy account settlement information
    (col. 15, lines 12-36, fig. 3, ref. num 251/252, fig. 5, and fig. 3, input
    "FROM SERVER I/F 24"),
  - Said accounting information related to payment for said media contents (col. 15, lines 24-30),
  - Said media contents received directly by said at least one information processing apparatus from said content provider (col. 14, lines 35-41);

Application/Control Number: 09/719,015 Page 6

Art Unit: 2136

 Generating payment information when said accounting information is processed at said master information processing apparatus (col. 16, lines 3-21);

- Transmitting said payment information to said content provider (fig. 2, ref. num 212 transmits information to the INTERNAL SCRAMBLER 23 and then to the SERVER I/F 24, where the data can go to the TERMINAL MANAGING PORTION 25 or the end terminals 3); and
- Receiving registration conditions from said content provider (fig. 2, ref. num 221, received from the TERMINAL MANAGING PORTION 25, which obtained information from the end terminal 3),
  - Wherein the registration conditions are prepared in response to receiving said payment information from the master information processing apparatus that settle payment for media contents received directly by said at least one information processing apparatus (col. 16, lines 34-59).

Regarding <u>claim 9</u>, <u>Matsuzaki et al.</u> teaches wherein said control apparatus includes a service provider (col. 1, lines 13-15).

Regarding <u>claim 10</u>, <u>Matsuzaki et al.</u> teaches wherein said information processing system includes an electronic music distribution system (col. 1, lines 9-13).

Claim Rejections - 35 USC § 103

Art Unit: 2136

6. <u>Claim 11 and 12</u> are rejected under 35 U.S.C. 103(a) as being unpatentable over <u>Matsuzaki et al.</u> (U.S. Patent No. 6,289,314) as applied to claim 8 above

Regarding <u>claims 11 and 12</u>, <u>Matsuzaki et al.</u> teaches all the limitations of claim 8, above. However, <u>Matsuzaki et al.</u> does not teach wherein said first transmitter transmits said appropriate proxy account settlement information to said at least one information processing apparatus over a local-area network and wherein said second transmitter in said master information processing apparatus transmits said accounting information to said control apparatus over a wide-area network.

Although Matsuzaki et al. does not teach the limitations of claims 11 and 12, it is well known in the art to use any number of ways to communication information from one device to the next. Some ways that are well known are over a local bus, as in the Matsuzaki et al. reference, over cable, wireless transmission, POTS, LAN, WAN, or any other hierarchy that allows multiple devices to communicate.

It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to use a LAN for communication of the proxy account settlement information to the information processing apparatus and a WAN for communication of the accounting information to the control apparatus. It would have been obvious to perform these actions because a LAN and WAN both allow communications to occur

Art Unit: 2136

between devices which are physically separated, thus allowing the communications to

be more functional and involve a broader range of devices.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Brandon S. Hoffman whose telephone number is 571-

272-3863. The examiner can normally be reached on M-F 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Ayaz R. Sheikh can be reached on 571-272-3795. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
